PATHMD MOLECULAR TEST MENU INDEX

15 searchable categories from the uploaded 3-page PathMD menu (reference index)

RESPIRATORY

Respiratory Plus Panel, Respiratory Lite Panel, COVID / Flu / RSV, Group A Strep Panel, Pediatrics Respiratory Panel, Limited Respiratory Panel.

Menus differ by included bacterial and viral organisms; check the interactive PathMD panel catalog for exact pathogen lists.

GASTROINTESTINAL

Gastrointestinal Pathogen Panel and Gastrointestinal Plus Pathogen Panel; the Plus panel includes Cyclospora along with the GI pathogens listed in the vendor menu.

URINARY, WOUND, AND PROCEDURE

Urinary Tract Pathogen Detection with ABX; Prostatitis Pathogen Detection with ABX.

Wound Pathogen Detection with ABX; Pre-Procedure / Pre-Surgery Pathogen Detection with ABX.

SEXUAL HEALTH AND FUNGAL

STI Pathogen Detection Test; STI with Vaginitis Pathogen Detection; Fungal Panel (RT-PCR).

IMPORTANT LIMITATIONS

The test menu lists molecular pathogen targets and resistance markers, not a validated specimen collection table. Confirm specimen type, transport medium, test codes and requirements with PathMD before drawing.

A molecular resistance-marker detection does not establish a complete susceptibility profile. Review results with the responsible clinician.

Prepared as a quick reference from the supplied vendor materials. Current approved SOP governs.
